EDUCATION

B.Tech in Mechanical and Automation Engineering *7.64 CGPA* 2023-2027
Maharaja Agrasen Institute of Technology

Grade XII, CBSE *81.2%* 2022
Bal Bhavan International School, Dwarka, Delhi

Grade X, CBSE 87.8% 2020
Bal Bhavan International School, Dwarka, Delhi

EXPERIENCE

1. Defense Research and Development Organization (DRDO) **Jul 2025 — Aug 2025**
Data Analyst – SSPL Lab *Delhi, India*

- Performed statistical **data analysis** and on large experimental datasets using MATLAB to identify performance trends.
- Developed **analytical data models** to extract key metrics from multi-variable, temperature-dependent datasets.
- Created **dashboards, visualizations, and analytical reports** to support data-driven technical decision-making.

2. Mera IPU (meraipu.in) **Dec 2025 — Feb 2026**
Business Analyst *Delhi, India*

- Conducted **detailed user, market, and competitor analysis** to identify product feature gaps, user needs, and potential growth opportunities.
- **Analyzed user engagement and conversion funnel data** to uncover drop-offs and support improvements in course discovery and conversion rates.
- Supported **product and business strategy** by synthesizing insights from benchmarking, **SWOT analysis**, and **market research** into actionable recommendations.

3. CrackNonTech **Jan 2026 – Mar 2026**
Analyst Fellowship *Remote*

- Mastered business fundamentals through non-tech industry overviews, **profitability analysis, market entry strategies, and business case studies.**
- Sharpened **analytical thinking skills** by tackling **guesstimates, case studies**, and **complex business problems**. Learned
- to dissect challenges and present data-driven solutions
- Used **SQL and Python** for basic data analysis and presented insights through concise stakeholder presentations.

PROJECTS

1. Food Delivery Profitability & Discount Impact Analysis | *Python,NumPy, Pandas, Streamlit, Plotly*

- **Analyzed 1,000+ food delivery orders using Python** (Pandas, NumPy) to evaluate profitability drivers including order value, discounts, commissions, and delivery fees.
- Built **end-to-end data analysis pipeline** with revenue simulation and visual insights to identify discount strategies and restaurant-level profit performance.

2. Cohort Analysis | *Python, Pandas, Streamlit, Plotly*

- Performed **cohort-based retention analysis** to identify **churn patterns** and high-value customer segments.
- Estimated **customer lifetime value (LTV)** across cohorts to support pricing and **retention strategy decisions**.

TECHNICAL SKILLS

• C++ • Python • SQL • Microsoft Excel • Power BI • Machine Learning • Data Analysis

POSITION OF RESPONSIBILITY

ASHRAE MAIT Student Branch Sept 2025 — Present
President *Delhi, India*

- Led **chapter operations and coordinated technical events, workshops, and industry interactions** for student member.
- Represented the chapter in coordination with **faculty advisors and external professional bodies**, strengthening **industry–academia** engagement.

ACHIEVEMENTS

- Filed **Two Patents(**Patent No. **202511046653** and **202511047105)** related to HVAC system design.
- Completed On-site Summer Training Program at **Daikin** (Rajasthan Factory).
- Completed a **3-month Full Stack Web Development training** at Wayspire EdTech Pvt. Ltd.
